

professional resume

Dear Sir/Madam,

I have over **2 years** experience as a Web Designer.

Throughout my work as Web Designer in my career I have done some web sites, and trained junior employees in the design techniques to increase their creativity. I enjoy working with the clients, as well, demonstrating web presentations, and educating others in their uses. I believe I would excel as a web designer because I truly find web designing as a challenging and rewarding career; as well, my designing background offers an advantage in better understanding the web sites I would do.

May I get a mail to further discuss my qualifications and the projects that I have done? I am available for an interview at a mutually convenient time.

Some of my latest projects are
